Company Background

The PrecisionPros.com Network was founded in 1997 (it was called World Class Web Sites at that time). In the beginning, we focused primarily on CGI/MySQL programming. In 1999, we hired our first full-time programmer. By 2000 we hired a second programmer (both programmers are still employed by us today). Our programming jobs are typically customizations to open source solutions, and MySQL related applications.

In 2000, while still focusing on CGI/MySQL programming, we began doing System Administrative work on Verio VPS servers. We found that a great number of Verio resellers needed help getting the full potential from the VPS servers. We created the 'ProviderTalk.com' website and mailing lists, created an add-on to iManager called iManagerPro (allowing sub hosted accounts to manage their own emails), and began VPS migration services.

PrecisionPros has grown over the years through word of mouth and through web hosting acquisitions. Since 1998, we have acquired 12 Verio reseller's accounts. In most of these instances we only took over the web hosting portion of the company's business. This enabled the companies to concentrate on their core business. The majority of these companies have also become our clients.

"Since 1998, we have acquired 12 Verio reseller's accounts."

PrecisionPros.com is a Gold+ viaVerio reseller. We are a member of the viaVerio "Reseller Advisory Board" and actively help shape the future of the Verio reseller channel. We now manage over 3,000 websites, and provide programming services to nearly 400 clients.

Products, Services and Pricing

VPS Software Updates – Beyond vinstalls and port installations. We keep your core server products up to date when new releases come out from the developers – no need to wait for Verio. Perl, PHP, MySQL, SpamAssassin, ClamAV, phpMyAdmin, TextPattern, WordPress, and many others.

\$24.95/month/server

(discounts based on server quantity and bundled services).

VPS Vulnerability Scanning – We identify vulnerabilities real-time, and provide recommendations and solutions for improvement. Users are checked for insecure passwords. Third party software is monitored and patched when exploits are found. Servers are monitored for installation of hacker scripts. Log files are scanned for suspicious activity.

\$24.95/month/server

(discounts based on server quantity and bundled services).

VPS Monitoring Services - Optimize your web-based services and deliver a superior online experience to all of your customers by having us monitor the uptime and performance of your server.

\$9.95/month/server

(discounts based on server quantity and bundled services).

	Monthly Fee
VPS Software Updates	\$24.95
VPS Vulnerability Scanning	\$24.95
VPS Monitoring Services	\$9.95

VPS Server Management – Our in-depth knowledge and familiarity with the VPS hosting environments and our years of experience in Unix system administration allows us to complete tasks in minutes what might take others hours to do. The prices below include the VPS server, along with our management services.

	Managed VPS Monthly Fee
VPS3 Basic	\$75.00
VPS3 1000	\$149.95
VPS3 2000	\$329.95
MPS2 Basic	\$549.95
MPS2 1000	\$749.95
MPS2 2000	\$995.00

VPS Migrations - We take the fear out of migrating to new Verio platforms. Take advantage of the ‘latest and greatest’ that Verio has to offer. PrecisionPros can migrate your servers to the new VPS3 platform quickly and efficiently.

	Migration Fee
VPS1 → VPS3	\$429.00
VPS2 → VPS3	\$229.00
VPS1 → MPS2	\$429.00
VPS2 → MPS2	\$229.00
Solaris → VPS3	\$429.00

Custom Programming – PrecisionPros specializes in MySQL and Unix programming on the Verio VPS servers. Over the years, we have written a wide variety of applications for reuse on VPS servers. Things like MySQL administrative programs, migration scripts, and vulnerability checks are just a few mouse clicks away from being installed and running on your servers. Custom programming jobs are secure, reliable, scalable and customized specifically for your needs.

Custom Programming: \$108.00/hour.

Management Team

Mark A. Sharkey – Founder, CEO

The PrecisionPros.com Network began in 1997 as World Class Web Sites (WCWS). Founder Mark Sharkey launched WCWS to provide custom CGI programming solutions and Web site hosting services to a rapidly growing client list. Prior to starting WCWS, Mark worked as a programming consultant for over 10 years with such companies as Rolls Royce Aerospace, McDonnell Douglas, Boeing, Computer Sciences Corporation, Motorola and Mobil.

Candace J. Sharkey – Director of Finance

Candace has served as Director of Finance since 1997. She is a registered CPA and obtained her Business Accounting degree with Distinction from Indiana University. Prior to joining PrecisionPros, Candace worked for the public accounting firm Bradley and Associates as a senior accountant and supervisor.

Michael Budash – Senior Programming Manager

Michael has served as Programming Manager since 1999. Michael joined PrecisionPros.com in 1998 as an independent consultant, working through the programming company that he founded in 1991. After working as a consultant with PrecisionPros.com for a year, Michael accepted the position of Programming Manager, and merged his company's clientele with PrecisionPros.

John W. Smith – Senior Programming Manager

John has served as Programming Manager since 2000. He has a Bachelor of Science degree from Indiana State University in Computer Science, and a Masters degree from Purdue University in Computer Engineering. Prior to joining PrecisionPros, John worked for Rolls Royce Aerospace for 15 years.

Robyn Glazner – Project Manager / Supervisor

Robyn joined PrecisionPros in 2005 part time, and became a full-time employee in 2006. Prior to joining PrecisionPros, Robyn worked for over 6 years at Verio as a Technical Support Supervisor and Technical Lead.
